Subject: Lease Line on OFC/LAN to IDSP for IHIP - regarding

Dear Mission Director,

Integrated Disease Surveillance Project has been implemented to detect early warning signals of impending outbreaks of epidemic prone diseases and help initiate an effective response in a timely manner. In the initial phase States/UTs and their districts were provided with a broadband connection from BSNL which was paid by NIC/NICSI centrally, later on this was decentralized to States/UTs for making payments directly since July 2010.

IDSP regularly conducts Video Conferencing (VC) sessions on daily basis through NIC's Web Learning application i.e. webcon.nic.in for the following activities:

- Implementation & Monitoring for IDSP/IHIP
- Discussion on prevalent disease outbreaks
- Training of various categories of workforce IDPS/IHIP

This proposal is with regards to providing the lease line on Optical Fibre Cable (OFC) of at least 10 MBPS to SSU IDSP on National Informatics Centre (NIC) network. It has been informed that at many places, NHM unit is already equipped with dedicated lease line facility, whereas IDSP unit co-located within the same campus lacks the same. I therefore request you that if the lease line already exists with the NHM unit, then the same may be extended to SSU IDSP over Local Area Network (LAN)/OFC for monitoring and implementation of IHIP/IDSP in your state.

Further, the cost involved for this may be met from programme management and operations cost under NHM. For any other queries, NPO (IDSP) (idsp-npo@nic.in) or Joint Director, IDSP (pradeep.khasnobis@gov.in) may be contacted.

With regards

Yours Sincerely,

(Manoj Jhalani)

Mission Director - NHM, of all States/UTs.
